Effective parking space management is one of the key challenges faced by city planning authorities and perhaps a biggest obstacle for development of smart cities. As end users we also come across scenarios like

- Parking lot occupied by others
- Unauthorised occupancy of visitors parking
- Dependency on physical security to share our parking with friends
- Limited time sharing - Rent your parking space
- Waste time to locating free parking space
- Queue to make payments with limited options

Ezz Park intends to address the above issues and serve all the stakeholders towards creating better parking experience through smart parking ecosystem.

### What is Ezz Park?

Ezz Park is an IOT (Internet of Things) based parking solution equipped with a physical metal barrier to reserve the parking space. It comes with a simple, intuitive APP to operate the barrier, share, navigate and make payment. Ezz Park is quick to install and easy to use, aims at creating a hassle free parking experience.

### Models

#### 1) Individual Parking(Apartments & Business Centres)

The platform allows owners to lock and unlock their parking spaces with smart barrier, and share the parking space with the friends and relatives. The owner of this device, can enable temporary access for the guests through the APP and can share the token through message / whatsapp.

#### 2) Rental Parking Spaces

This platform will enable the owners of parking spaces to rent and share their vacant spaces with drivers looking for an available parking via mobile App. The app allows drivers to view available parking spaces, and navigate to them in real-time.

#### 3) Public Parking

Ezz Park can also be used as complete parking solution at public parking places to make use of the facility in an effective way and also create better parking experience.

Smart Barriers, installed at public parking places like (Malls, hospitals, etc.), through which users can search the available parking space, reserve, navigate the same and make payment with multiple options through the convenience of the APP. Thus avoiding the hassles of searching, queuing etc.

This also would help the parking owners to have premium parking spots, run loyalty schemes and can promote sales for retailers.

### Features

-  Parking space reservation
-  Easy installation
